NATALIE RAINE

Dark Nights With Poe And Munro

I was absolutely charmed playing Dark Nights With Poe and Munro as soon as I heard the opening theme from each in-game 'episode'. Klemens Koehring and Leah Cunard are both spellbinding in their titular roles, with well-written banter every time they're on screen. Every adventure was like a sexy thriller, whether there are murders to be solved or funds to be raised to keep the lights on. FMV-style games are a genre we rarely see nowadays, but I'm glad games like Dark Nights are keeping the torch alive with fun, spooky, and satisfying adventures long after the sun goes down.
